

Smith's Chapel United Methodist Church Churchville, Maryland

PROJECT PROFILE

The project at Smith's Chapel consisted of a one-story, 1000 SF with full basement addition. The structure was designed to accept a second story addition in the future. In the meantime, the purpose of the addition, which is an expansion of existing space, includes a private office for the Pastor, church office, restrooms, and a multi-purpose room. The multi-purpose is to house a library and used as a reading room as well as for meetings. The church requested this room be exposed to natural light and open to a future courtyard. The expansion also made way for a nursery for children up to age 5. This room had to meet daycare codes and standards and the addition was made handicapped accessible. We coordinated the construction to blend with the commercial kitchen.

Client:

Smith's Chapel
United Methodist Church
3111 Churchville Rd
Churchville, MD 21028

Project Type:

Church Expansion

Location:

Churchville, Maryland
